SKILLS

BACK END DEV | NodeJS • NestJS • Express • Spring • Symfony
FRONT END DEV | React • NextJS • Angular • HTML • CSS • Bootstrap
DIVERS | Problem Solving • Flutter • Firebase • Amazon AWS • MongoDB • Gitlab • Jira • Docker • Ansible

EXPERIENCES

Sopra Steria x Orange - Dev. Web Full Stack
Feb 2024 - July 2024 (Final Internship)

- Participate in the development and validation of backend and frontend components in two separate projects: one based on **Next.js** and **Nest.js**, and the other on **React** and **Node.js**, both linked to Orange PaaS services.
- Contribute to the drafting of technical and functional specifications.
- Lead agile ceremonies (**Scrum** and **SaFe**) and participate in estimating the complexity of tasks.
- Carry out technical and functional studies.
- Identify areas for improvement in the project and present the work to the team and the client during system demonstrations.

SFM Group - Developer
July 2023 - Sept 2023 (internship)

- Develop a **Flutter** application based on the same principles as the existing application in production, developed in **Java** for **Android**, an internet connection quality testing solution.
- Collect test results to assess the quality of network coverage in each region, using a **Node.js** backend to analyze this data and **React.js** for data visualisation website.

ATTT - Developer
July 2022 - Aug 2022 (internship)

- Developed a mobile application using **Flutter** to track import requests for vehicles for people with disabilities.
- Implement web APIs (**Node.js**) to improve the interaction between the mobile application and the server.

beFlutter Pro - Founder and Instructor
Jan 2021 - June 2022

- Creation of an online educational platform with **React Node.js** and **Firebase.**
- Introducing 13+ apps in **Flutter** to guide beginner developers.

EDUCATION

Exchange Program
2023 - 2024 | ISEP PARIS
Computer Engineering Cycle
2021 - 2023 | ESPRIT
MPI Preparatory Cycle
2019 - 2021 | IssatSo

LANGUAGES

French - Fluent
English - Fluent (ICIMS C1)
German - A2
Arabic - Mother Tongue

PROJECTS

2023 XOAuto | Node.js • Angular
Automobile Advertising Platform

- Participate in the complete application lifecycle, including design, coding, testing, implementation, deployment, and support and maintenance by collaborating with others developers.

2023 GrowFunds | Spring • Angular
Microfinance services

- Develop a robust complaints management system, integrating AI algorithms for synthesis and prioritization.
- Implement a comprehensive notification system for real-time updates.
- Design and develop an AI-powered chatbot for seamless user interaction
- Contribute to the design and development of credit and savings simulators

2022 The TakeAway | Symfony • JavaFX
Service management for a restaurant chain

- Design and develop a reservation system for customers, allowing them to select tables from a 3D view of the restaurant.
- Integrate billing features with Stripe and PayPal for online payments.
- Implement a QR menu management system for easy access to menus.
- Integrate email notifications and calendar scheduling for effective communication and planning.
