PROFILE

Passionate about web development, with a talent for problem solving, I am proficient in various programming languages and frameworks, with experience in developing and deploying applications on multiple platforms. Dedicated team member with excellent communication skills.

EXPERIENCES

5dma.Pro - Web Full Stack Developer

Oct 2023 - Nov 2023

- Designed and developed an internship job board using the MEAN stack.
- Developed a powerful search feature, enabling candidates to easily discover internship opportunities that match their preferences.
- Created an intuitive application tracking system, allowing candidates to monitor their application status and progress with ease.

www.5dma.Pro

SFM Group - Developer (Intern.)

July 2023 - Sept 2023

- Develop a **Flutter** application based on the same principles as the existing application in production, developed in Java for Android, an internet connection quality testing solution.
- Collect test results to assess the quality of network coverage in each region, using a **Node.js** backend to analyze this data.

EDUCATION

Exchange Program

2023 - 2024 | ISEP PARIS

Engineering Cycle in computer science

2021 - 2023 | ESPRIT

MPI Preparatory Cycle for engineering studies

2019 - 2021 | ISSAT SOUSSE

SKILLS

- Angular
- Node.js
- MongoDB
- Express
- Spring boot
- Flutter

- JS / TypeScript
- Java
- Python3
- Dart
- AWS
- Firebase

LANGUAGES

- French: Fluent
- English: Fluent
- Arabic: Native
- Deutsch: Basic proficiency

ATTT - Mobile Developer (Intern.)

July 2022 - Aug 2022

- Developed a mobile application using **Flutter** to track vehicle import requests for people with disabilities.
- Implement web APIs (Symfony) to improve the interaction between the mobile application and the server.

beFlutter Pro - Founder and Instructor

Jan 2021 - June 2022

- Creating an online educational platform using **Node.js** and **Firebase**.
- Showcasing 13+ **Flutter** applications to guide junior developers.

beFlutter.Pro

COMMUNITY LIFE

- **ACM Esprit**

Training Manager 22-23

- **IEEE Esprit**

Member 21-23

- **ISSATso Google Club**

Member 19-21

- **Microsoft ISSATso**

Member 19-21

PROJECTS

2023 **XOAuto**

Spring Boot + Angular + MySQL

An automotive marketplace platform.
- Designed and developed an internship job board using the MEAN stack.
- Developed a powerful search feature, enabling candidates to easily discover internship opportunities that match their preferences.
- Created an intuitive application tracking system, allowing candidates to monitor their application status and progress with ease.

2023 **GrowFunds** *Bal des projets*

Spring Boot + Angular + MySQL

Digital platform for microfinance services
- Developed a robust complaint system, integrating AI algorithms for summarization and prioritization.
- Implemented a comprehensive notifications system for real-time updates.
- Designed and developed an AI-powered chatbot for seamless user interaction.
- Contributed to the design and development of credit and savings simulators.

2022 **The TakeAway**

Symfony + JavaFX

A service management platform for a restaurant chain.
- Designed and developed a reservation process for clients, allowing them to select tables from a 3D view of the restaurant.
- Integrated billing functionality with Stripe and PayPal for convenient payments.
- Implemented a QR menu management system for easy access to menus.
- Integrated mail notifications and calendar planning for effective communication and scheduling.
